

Page 1 Setting up the S-pushTAN app

You need

- Your initial access data
- The registration letter

You should have received both through the postal system or from your advisor.

1 Download the S-pushTAN app from the App Store or from the Google Play Store.

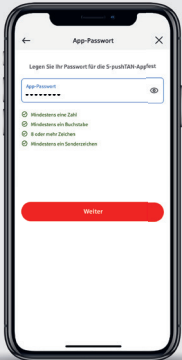

2 Open the app and click on „Jetzt einrichten“.

3 Allow the app to send you notifications. You will be informed as soon as an order must be approved.

4 Generate a password and confirm this. The password must consist of at least 8 characters.

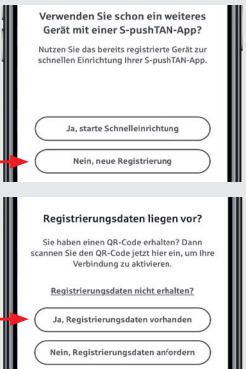

5 In the next step, you can decide whether you would like to unlock the app with the aid of a biometric feature or the password. Confirm your choice as appropriate.

6 Now, click on “Nein, neue Registrierung” [“No, new registration”].

Then, click on “Ja, Registrierungsdaten vorhanden” [“Yes, registration data on file”].

Setting up the S-pushTAN app

7 Allow the app to access your camera in order to import the data from the registration letter. As an alternative, you can enter the data by hand.

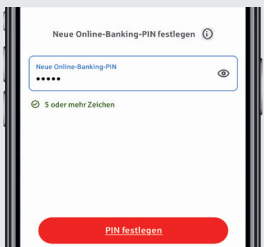

8 Now, aim the camera at your QR-code in the registration letter in order to activate the account.

9a Existing customers: Following this step, you must enter your login name or your legitimization ID and your online banking PIN.

9b New customers: Enter your start PIN from the initial access data and set your new online banking PIN immediately thereafter.

10 The pushTAN process has now been successfully activated. You can easily and securely authorize your online banking transactions.

For more on this, read our additional instructions regarding the S-pushTAN app

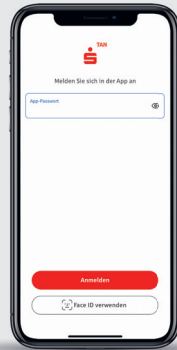

- Add additional pushTAN accounts
- Use S-pushTAN on numerous devices

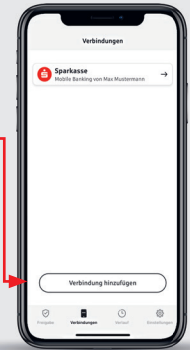

www.sparkasse-bielefeld.de/app

Add additional pushTAN accounts

- 1** To add additional pushTAN accounts, log into the S-pushTAN app.

- 2** Click on „Verbindungen“ and then on „Verbindung hinzufügen“.

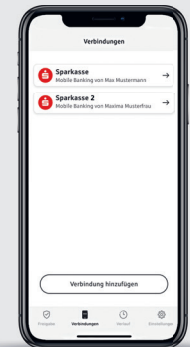

- 3** Now, set up the new S-pushTAN account as described in the instructions for „Einrichtung der App S-pushTAN“.

It is not necessary to assign a new password for the app!

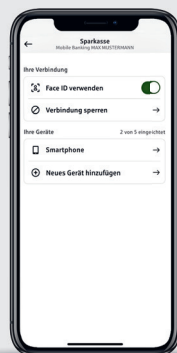

- 4** After successful entry, the new pushTAN account will be displayed.

- 5** Click on the name of the institution to manage the account.

Here, you can manage your biometric data, block the account, manage devices, and configure the delivery group, as needed.

Exclusion of liability:

These instructions were created in accordance with the current state of knowledge and are provided as a service. Differences in portrayal are not the responsibility of the savings bank or the authors. No liability is accepted for any occurring damages.

Use S-pushTAN on numerous devices

1 **New device:**
Log into the “S-PushTAN” app on the **new device**. Click on “Ja, starte Schnelleinrichtung” [“Yes, begin quick setup”] and then on “Weiter” [“Continue”].

* Bluetooth must be enabled on both devices

2 **New device:**
Create the QR code that connects the two devices with one another.

Old device:
Scan the QR code with the photo app of your old device. Your S-pushTAN app will start automatically.

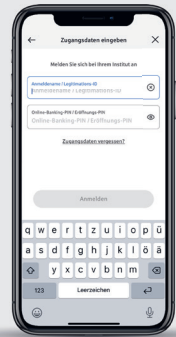

3 **Old device:**
Select the connection that you want to set up on the new device.

Enable the Bluetooth connection and carry out registration as soon as your new device is shown.

4 **New device:**
You will then be asked to enter your online banking access data on the new device.

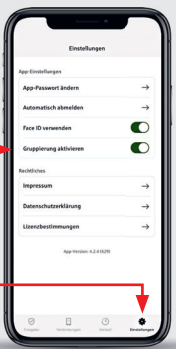

All registered devices will be shown under “Ihre Geräte” [“Your devices”].

5 **Activate grouping**

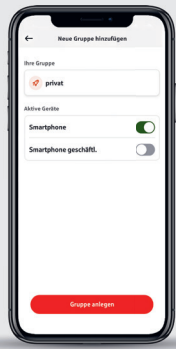

When you use your pushTAN account on numerous devices, you can configure groups.

Activate the function „Gruppierung aktivieren“ under „Einstellungen“.

6 Then, go into the respective pushTAN account under „Verbindungen“.

Configure with the function „Neue Gruppe hinzufügen“.
